

WEBREPORT

WebReport Scala 3

A high-performance analyzer for web content.

Project Overview

WebReport is a web content analysis tool built for Software Engineering education at HTWG.

Key Features

-  **Web Content Download** - Fetch and analyze websites
-  **Text Analysis** - Character/word count, top words, complexity scoring
-  **Content Filtering** - Filter content by keywords
-  **Undo/Redo** - Full command history support
-  **Session Persistence** - Save/load sessions in XML or JSON
-  **Dual Interface** - TUI (Terminal) + GUI (ScalaFX)

Development Timeline

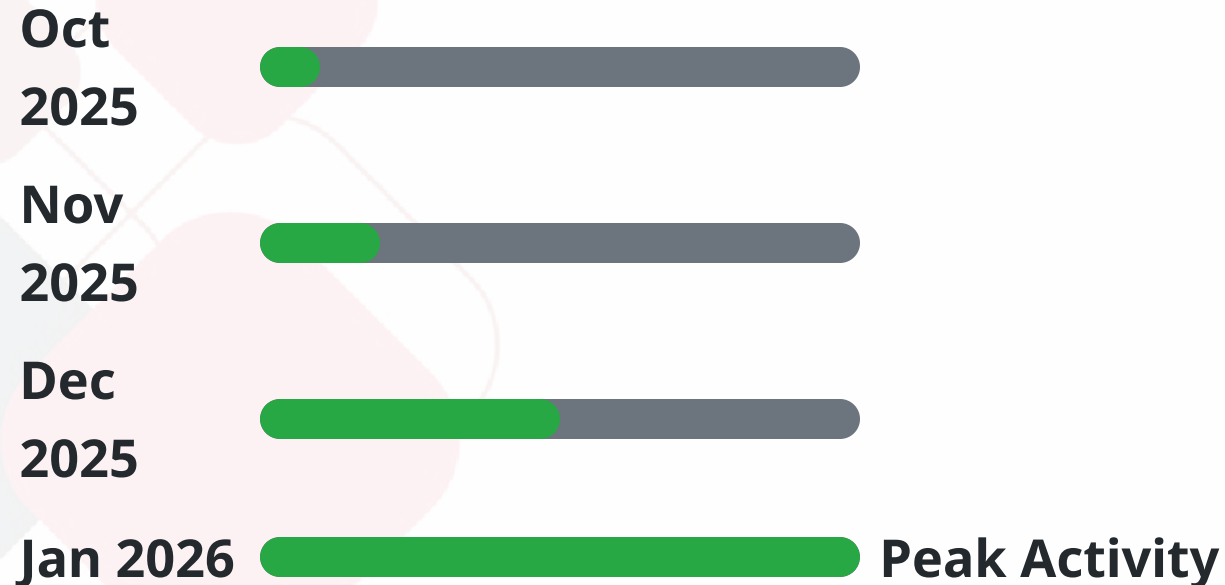

Oct 2025 Project Initialization — Repository created

Nov 2025 Core Development — MVC Architecture setup

Dec 2025 Feature Implementation — TUI & GUI, Tests, Scoverage

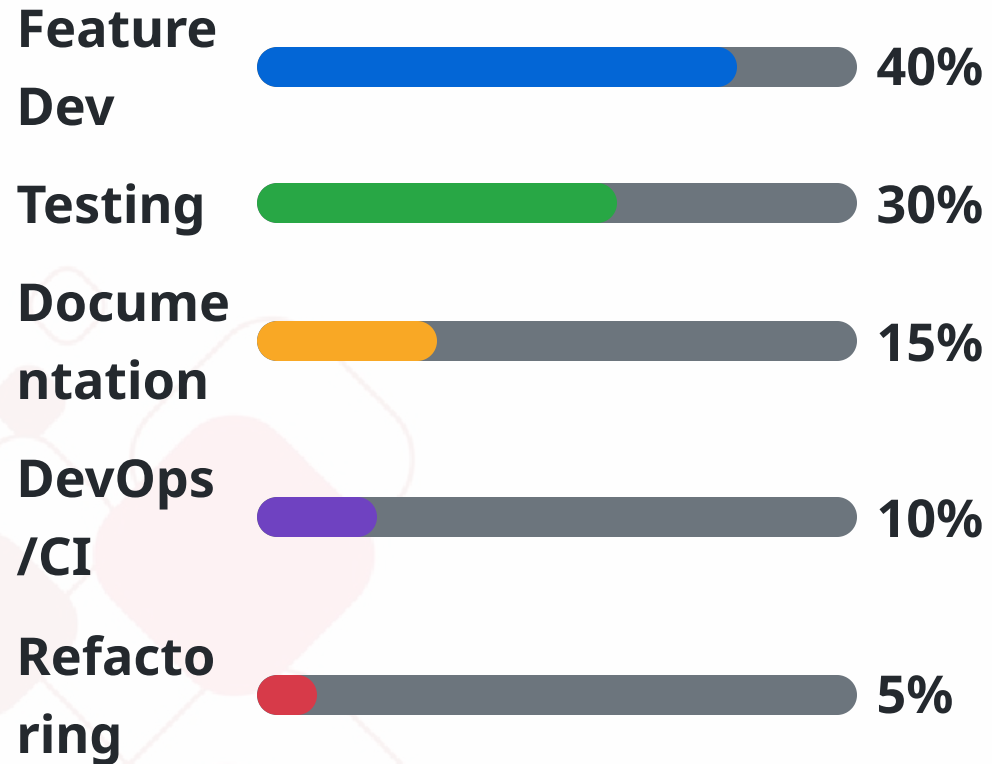

Jan 2026 Final Sprint — Docker, Coverage optimization, GUI improvements

Activity Intensity

Commit Activity Distribution

■ Feature Development ■ Testing & Coverage ■ Documentation
■ DevOps & CI/CD ■ Refactoring

Technology Stack

Component	Technology	Version
Language	Scala 3	3.4.2
Build Tool	SBT	latest
GUI Framework	ScalaFX	21.0.0-R32
DI Framework	Google Guice	7.0.0
Testing	ScalaTest	3.2.19
Coverage	Scoverage + Coveralls	2.1.0

src/main/scala/de/htwg/webreport/

Test Suite Overview

Test File	Purpose
WebReportSpec. scala	Integration tests
IntegrationSpec.scala	Full system tests
TuiSpec.scala	Terminal UI tests
TuiStateSpec.scala	State pattern tests
GuiSpec.scala	GUI component tests
RendererSpec.scala	Output rendering tests
DataSpec.scala	Data model tests
ObserverSpec.scala	Observer pattern tests

Coverage Exclusions: Main, Tui, TuiState, Renderer, Gui

Architecture Overview

VIEW LAYER

TUI (Terminal)

GUI (ScalaFX)

← *Observer Pattern*

CONTROLLER LAYER

SessionManager (Observable + Originator)

← *Command Pattern | Memento Pattern*

MODEL LAYER

Analyzer (Trait)

WebClient (Trait)

FileIO (XML/JSON)

Pattern	Purpose	Location
Observer	UI Synchronization	util/Observer.scala
Command	Operation Encapsulation	util/Command.scala
Memento	Undo/Redo Support	util/Command.scala
State	TUI Mode Switching	aview/TuiState.scala
Template Method	Report Structure	aview/Renderer.scala
Decorator	Feature Extensions	aview/Renderer.scala
Strategy	Interchangeable Serialization	model/fileio/
DI (Guice)	Loose Coupling	WebReportModule.scala

Dependencies

WebReport 1.0.0

- └─ org.scala-lang » scala3-library 3.4.2
- └─ org.scalafx » scalafx 21.0.0-R32
 - └─ org.openjfx » javafx-* 21.0.2
- └─ com.google.inject » guice 7.0.0
- └─ org.scala-lang.modules » scala-xml 2.2.0
- └─ com.typesafe.play » play-json 2.10.4
- └─ [test]
- └─ org.scalatest » scalatest 3.2.19
- └─ org.scalactic » scalactic 3.2.14

Plugins

- └─ org.scoverage » sbt-scoverage 2.1.0
- └─ org.scoverage » sbt-coveralls 1.3.15

Jan

17 Set title and dimensions for primary gui stage

Jan

16 Update coverage badge in README.md

Jan

16 Change run command to use Docker

Jan

16 Add docker support

Jan

16 Exclude Renderer from test coverage

Jan

16 Add more tests

Jan

15 Improve GUI UX and add GUI test cases

Jan

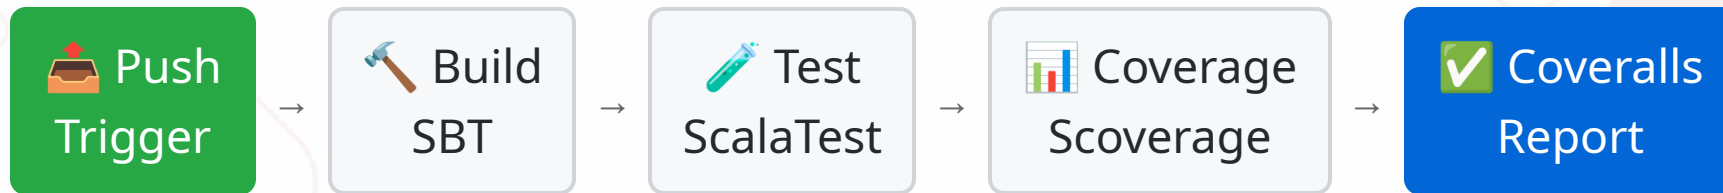

15 Add normalization to site complexity

Jan

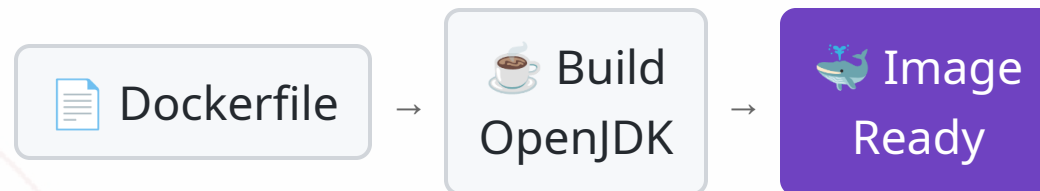

CI/CD Pipeline

GitHub Actions Workflow

Docker Build

Deployment Options

Method	Command	Description
Local Development	<code>sbt run</code>	Launches TUI + GUI simultaneously
Docker Container	<code>./docker-run.sh</code>	X11 forwarding for GUI support
Packaged JAR	<code>sbt package</code>	Standalone executable
Test Mode	<code>sbt coverage test</code>	Run tests with coverage report

Key Takeaways

-  Clean MVC Architecture with clear layer separation
-  8+ Design Patterns applied in practice
-  Modern Scala 3 with trait-based interfaces
-  Dual Interface (TUI + GUI) via Observer pattern
-  Full Undo/Redo via Command + Memento patterns
-  Extensible serialization with Strategy pattern
-  Comprehensive test suite with Scoverage
-  Docker support for containerized deployment
-  CI/CD pipeline with GitHub Actions
